

Special Issue

Next-Generation Cancer Immunotherapies: Tracking, Targeting and Reprogramming the Immune Response

Message from the Guest Editor

This Special Issue invites the submission of original research and review articles exploring molecular and cellular strategies that advance immune tracking, therapeutic targeting, and synthetic reprogramming in cancer. Topics of interest include immune engineering, tumor immune evasion, biomarker-guided therapy, synthetic immunology, and translational applications across hematological and solid malignancies. We aim to provide a comprehensive and forward-facing view of how the immune response can be harnessed and redesigned to meet the new frontiers of cancer treatment.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
