

Special Issue

Mutant p53 in Cancers

Message from the Guest Editor

The importance of cancer-cell-autonomous functions of the tumor suppressor p53 (encoded by TP53) has been established in many studies. Loss or mutation of p53 in cancers can affect fundamental cellular pathways and cancer progression. Understanding the genetic and epigenetic mechanisms that control the p53 protein, as well as its complex post-translational regulation will help to design more effective therapies to target mutated p53 in cancer. This special issue will focus on original studies describing the unraveled roles of mutant p53 in cancers. Research topics may include (but are not limited to) the following:

- Restoring p53 activity in cancer;
- p53-dependent and p53-independent strategies for targeting p53 pathway functional restoration in p53-mutated cancer
- Targeting p53 mutations and/or p53 pathway;
- Combination therapies targeting p53, immune checkpoints for cancer therapy
- Role of TP53 mutations in cancer;
- Correlation of TP53 mutations with other gene mutations in cancer.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
