

## Special Issue

# Regenerative Medicine: Biomaterials and Stem Cell Research

### Message from the Guest Editor

Regenerative medicine is an emerging field that combines biomaterials and stem cells to repair, replace, or regenerate damaged tissues and organs.

Biomaterials provide structural and biochemical support that facilitates tissue regeneration. They are designed to be biocompatible and, in many cases, biodegradable, allowing them to integrate safely into the body. Stem cells, with their unique ability to differentiate into various types of specialized cells, are essential in this field.

These cells can be obtained from various sources, such as embryonic, adult, and induced pluripotent stem cells (iPSCs). Research focuses on optimizing the conditions for the growth and differentiation of these cells in combination with suitable biomaterials. This Special Issue wants to focus on both basic and clinical studies that incorporate biomolecular experiments to have a more complete comprehension on how the integration of biomaterials and stem cells in regenerative medicine is revolutionizing the ability to treat degenerative diseases, severe injuries, and the scarcity of organs for transplants, offering new hope for improving patients' quality of life.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
