

Special Issue

Functional Analysis and Therapeutic Targets of Long Non-Coding RNAs

Message from the Guest Editor

Long non-coding RNAs (lncRNAs) have emerged as crucial regulators of gene expression and cellular processes, with their dysregulation being implicated in various human diseases. Consequently, lncRNAs have gained significant attention as promising therapeutic targets. The aim of this Special Issue is to provide a comprehensive overview of the latest advances in the functional analysis and therapeutic targeting of lncRNAs, with a particular emphasis on the development of novel lncRNA-based therapies. We welcome original research articles and review manuscripts addressing the following two topics: (a) lncRNA-targeted therapeutics: This Special Issue will highlight the development of novel therapeutic strategies targeting lncRNAs, including approaches that modulate lncRNA function, stability, and localization. (b) lncRNA-based therapeutic modalities: Submissions exploring a wide range of therapeutic modalities for targeting lncRNAs, such as antisense oligonucleotides, small interfering RNAs (siRNAs), CRISPR/Cas9 gene editing, and small-molecule modulators, are highly encouraged.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
