Molecular Pathology Research on Blood Tumors

Message from the Guest Editor

The World Health Organization (WHO)'s medical advances contribute to updating the famous WHO Blue Books, a series of 15 books that classify up to 300 tumor histotypes according to their definition, code, synonyms, epidemiology, localization, clinical features, etiology, macroscopy, microscopy, cytochemistry, immunophenotype, ultrastructure, genetics, prognostic factors, and predictive factors. Among these tumors, there are undoubtedly those belonging to the hematopoietic and lymphoid tissues, which constitute the pathological basis of modern oncohematology. In 2022, the WHO Blue Book of hematolymphoid neoplasms has undergone a significant revision by an editorial board that was mostly composed of histopathologists and molecular pathologists, which was inserted in the fifth edition of the WHO classification for hematolymphoid tumors. The main purpose of this Special Issue is to focus, on a molecular level, on research on all these blood tumors.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
