Mechanisms of the Endocannabinoid System and Their Role in Neurophysiology and Psychopathology

Message from the Guest Editor

Recent research has demonstrated the involvement of the endocannabinoid system (ECS) in various psychological processes, including pain perception, emotion regulation and stress processing, as well as in mental disorders. However, despite its well-known pharmacological accessibility, treatment options specifically targeting this system and its components are still unoptimized, and there is still a need for further research on the molecular level. Basic in vitro and in vivo experiments and clinically oriented research in animals and humans on how the ECS and its modulation affect neural processing, psychological functioning and behaviour in health and disease could contribute to a better understanding of this system's mechanisms and inform the development of tailored treatment options. Guest-edited by with assistance from Dr. Jennifer Spohrs, a Topical Advisory Panel Member, this Special Issue focuses on recent studies that contribute to the understanding of the functioning of the ECS in psychopathology as well as potential therapeutic applications.

Guest Editor

Prof. Dr. Birgit Ablter

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
