Molecular Research on Advanced Optical Materials 2.0: From Materials to Applications

Message from the Guest Editors

The interaction between light and optical materials is widely studied since advanced optical materials have outstanding properties. Our Special Issue will include original research on various methods for the preparation and applications of optical materials. Topics for this Special Issue include, but are not limited to, the following: plasmonic materials; SERS substrates; fluorescent materials; carbon materials; meta materials; and advanced optical materials for biomaterials, energy, LED, etc.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
