Advances in Research for Fruit Crop Breeding and Genetics 2023

Message from the Guest Editor

The development of new fruit varieties is a long and tedious process involving crossing the parents with selected traits to generate desired seedling progenies to develop superior cultivars. While breeders' ability to generate large populations of such progenies is almost unlimited, the management and selection of these seedlings limit the progress of this process. Most fruit species have been sequenced and their reference genomes are available; this genomic analysis has evidenced high synteny between genomes and transcriptomes. From a global perspective, the center of gravity of the molecular processes is focused on the expression of genes and the way in which such expression is regulated, analyzing different omics, including genomics, transcriptomics, proteomics or epigenetics. This global omic perspective will be investigated in this Special Issue, which will highlight the main conclusions of this recent development for fruit crop breeding and production.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
