

Special Issue

Natural Products as Multitarget Agents in Human Diseases

Message from the Guest Editors

We are pleased to invite you to share your scientific achievements in the field of natural products (extracts and/or pure molecules derived from natural sources) that are utilized as potential novel therapeutic agents targeting wide spectrum of human diseases.

For centuries, natural products (NPs) have been proven as agents with numerous health benefits for humans and explored as a pool for the development of novel therapeutic drugs. Because of the side effects associated with conventional therapies, the search for novelty and safety from NPs with proven therapeutic qualities is increasingly imperative.

The aim of this Special Issue (SI) is to present high-quality novel research findings that evaluate the therapeutic effects of NPs with focus on the physiological, biochemical, and molecular processes underlying their mechanism of activity in in vitro and in vivo studies related to human health. The SI will accept original research articles, short communications, and reviews.

Guest Editors

Dr. Andrey Marchev

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
