# Inflammatory Bowel Disease: Focus on Molecular Research

### Message from the Guest Editors

Inflammatory bowel disease (IBD) is a chronic and relapsing inflammatory disorder of the GI tract that affects nearly 1 in 100 people in the US and exhibits increasing worldwide prevalence. Modern molecular techniques have partially elucidated the underlying mechanisms of this multifactorial disease. Nonetheless. while there exist several recently approved biologic and targeted therapies for IBD, these exhibit a consistent therapeutic ceiling of approximately 50%. The identification of additional biomarkers, actionable pathways, and novel therapeutics is needed. This Special Issue aims to report the latest findings in the molecular biology of IBD. These studies can involve any modern molecular technique, such as proteomic, phosphoproteomic, lipidomic, or metabolomic analyses: genetic and gene expression analyses including spatial transcriptomics and single-cell RNA sequencing: mechanistic investigations involving animal and organoid models; and microbiological analyses including 16s RNA or shotgun metagenomic sequencing.

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
