

## Special Issue

# Application of Nanomaterials and Molecular Detection in Human Diseases

### Message from the Guest Editor

Led by and assisted by our Topical Advisory Panel Member Dr. Qiuyue Ma (Harbin Institute of Technology), this Special Issue aims to provide a platform for novel research and advances in nanomedicine and molecular detection techniques. We invite all scientists working in these fields to contribute to this Special Issue. We welcome original research articles, reviews, and shorter perspective pieces on all aspects related to nanomedicine and molecular detection techniques. Relevant topics include, but are not limited to, cancer, infectious diseases, neurological diseases, hematological disorders, and cardiovascular diseases. Articles with insights into nanomedicine perspectives are particularly encouraged.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
