Therapeutics and Pathophysiology of Cognitive Dysfunction

Message from the Guest Editor

Cognitive dysfunction typified by impaired attention, learning, memory, and problem-solving skills is generally referred to as 'brain fog' associated with neuroimmune imbalance in multiple neurodegenerative diseases, malignancies, and associated metabolic conditions. In neuropsychiatric diseases, cognitive impairments are associated with suicidal tendencies, which are predictive of depression relapse and are frequently retained in individuals in remission from depressive episodes. Therefore, strategies aimed at enhancing the detection threshold of cognitive impairments and attenuating these deficits through modulating the underlying pathologies, such as diminishing neuroinflammation, enhancing neurogenesis, and metabolic fitness have garnered significant attention. The possibility of non-pharmacological methods like music therapy and pharmaceutical methods, particularly those that target the GABAergic system, to alleviate cognitive symptoms has recently been investigated. To increase the quality of life, however, this domain requires more attention.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
