Molecular Research on Andrology

Message from the Guest Editor

Male fertility is a critical component of human reproduction, yet it is often overshadowed by the more intensive study of the female reproductive study. Recent decades have seen a growing recognition of male factors as central contributors to infertility, accounting for nearly 50% of all infertility cases. The integration of molecular biology techniques into andrology allows researchers to conduct investigations, assessing parameters such as DNA fragmentation, oxidative stress, epigenetic modifications, and transcriptomic and proteomic profiles.

This research topic welcomes the submission of original research, reviews, mini-reviews, and systematic reviews.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
