

Special Issue

Design, Synthesis, and Modification of Efficient Catalyst Materials

Message from the Guest Editors

This special issue focuses on the design, synthesis, and modification of catalyst materials at the molecular level. And recent developments in synthesizing, functionalizing, and applying effective porous materials in catalytic processes, including zeolites, mesoporous materials, and so on, the emphasis is on research at the mechanism and molecular levels. These materials are of interest because of their wide variations in chemical composition and methods of obtaining them, as well as their potential applications. We cordially encourage you to submit research articles and reviews for this Special Issue to share your work, knowledge, insights, and recent accomplishments.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
