Molecular Insight into Nematodes Management

Message from the Guest Editor

The number of nematode species and their abundance suggest that the structure of the nematode community possesses much information on every habitat. Thus, novel and sustainable approaches in nematode management as well as their impact on free-living nematodes and generally on nematode biodiversity should be better investigated. The scope of this Special Issue is to promote studies on the use of biological strategies, including cultural practices, host plant resistance, anaerobic soil disinfection, biofumigation, nanoparticles, and the introduction or encouragement of antagonistic organisms, as well as the application of plant extracts into integrated pest management programs. In particular, this Special Issue aims to publish articles that focus on biocontrol agents as fungi, bacteria, and yeasts with nematicidal activity, as well as the diagnosis and detection of economically important plant-parasitic nematodes (PPN), the evaluation of the effect of biotic factors on PPN and free-living nematodes, and knowledge of nematode–biocontrol agent interactions at physiological and/or molecular levels.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
