

Special Issue

Molecular Pathology and New Potential Targeted Therapies in Gastrointestinal Cancers

Message from the Guest Editors

We are pleased to invite you to contribute to our Special Issue of the *International Journal of Molecular Sciences (IJMS)*, entitled “Molecular Pathology and New Potential Targeted Therapies in Gastrointestinal Cancers”. This Research Topic aims to gather the latest research and ideas on innovative approaches to exploit for clinical and therapeutic purposes the molecular mechanisms involved in the development of gastrointestinal cancer. We welcome papers that address the progress that has been made in understanding the molecular pathogenesis of gastrointestinal cancers, and the discovery of new potential biomarkers for early diagnosis or progression, that can be used as therapeutic targets for these malignancies. We are also interested in papers that investigate recent advances in the field of combinations of targeted and immunotherapy to overcome clinical resistance in cancer, and development of predictive biomarkers that may improve effective evaluation of these therapies. If you are interested in contributing your work, please send a short abstract or tentative title to the or Editorial Office.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
