Recent Advances in Human Papillomavirus (HPV) Research

Message from the Guest Editor

Human Papillomavirus (HPV)-associated diseases remain a significant global health challenge, contributing substantially to morbidity and mortality. These diseases impose severe health, social, and economic burdens. Recent advancements in molecular and “omics” technologies, laboratory instrumentation, and in silico analytical methods have significantly enhanced our understanding of HPV, mechanisms of carcinogenesis, viral–host interactions, viral evolution, and epidemiology. This Special Issue aims to create a platform for HPV researchers across various biomedical fields—including infectious diseases, virology, oncology, molecular biology, bioinformatics, and laboratory medicine—to exchange ideas, tools, and findings. The emphasis will be on the latest progress in employing novel molecular approaches or technologies in HPV or HPV-related research, spanning from basic science to population health. We invite the submission of original research manuscripts, methods articles, and reviews that highlight the latest advancements across diverse thematic areas of HPV research.

Guest Editor

Dr. Jane Shen-Gunther

Department of Molecular Medicine, University of Texas Health Science Center at San Antonio (UT Health), San Antonio, TX 78229, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
