

## Special Issue

# Genetics and Immunity of Mycobacterial Infections: A Battle of Two Genomes 2.0

### Message from the Guest Editors

Genetic investigation of TB infection susceptibility and disease severity has been ongoing for decades both in experimental and clinical settings. The previously unappreciated importance of innate host defense mechanisms has revolutionized the understanding of the host-pathogen relationship. Effective adaptive immune responses, including the key activity of mycobacteria-specific and bystander CD4 and CD8 effector and regulatory T cell populations, can control mycobacterial populations throughout the body, but can also promote the development of progressively destructive lesions in host tissues. Genetic and physiological manipulation of mycobacteria and the rational selection of genetically defined hosts in experimental settings provide useful information about how mycobacteria alter innate and acquired immune responses of the host, and what features of pathology underlie protective vs. pathogenic inflammatory responses. We believe that a series of articles within this framework will make a valuable contribution to a better understanding of these very important, rapidly developing and still highly controversial aspects of mycobacterial research.

### Guest Editors

Prof. Dr. David N. McMurray

Regents Professor Emeritus, Department of Microbial Pathogenesis and Immunology, Texas A&M College of Medicine, College Station, TX, USA

Prof. Dr. Alexander S. Apt

Professor and Head, Laboratory for Immunogenetics, Central Research Institute for Tuberculosis, Moscow, Russia

### Deadline for manuscript submissions

closed (31 January 2023)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
