Modeling Lipid Membranes and Permeation: Exploring Structure, Dynamics, and Transport Phenomena

Message from the Guest Editor

Lipid membranes are essential components of biological systems, playing a crucial role in various physiological processes. Understanding their structural properties, dynamic behavior, and the mechanisms governing permeation across these membranes is of paramount importance in fields such as biophysics, drug discovery, and nanotechnology. This Special Issue aims to delve into the modeling aspects of lipid membranes and permeation phenomena, providing a focused exploration of their intricacies. Therefore, authors are invited to submit original research and review articles that emphasize the modeling aspects of lipid membranes and permeation.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
