Special Issue

Novel Therapeutic Interventions and Drug Targets for Treatment of Cancer

Message from the Guest Editor

This Special Issue centers on the state-of-the-art healing modalities and more safe and efficient drug targets for improved cancer care. We particularly encourage submissions that detail the discovery and validation of novel drug targets, advancements in molecular and cellular mechanisms of action, and clinical outcomes of recent therapeutic interventions. Research articles, reviews, and case studies that provide insights into the translational potential of preclinical findings are also welcome. Additionally, discussions on the challenges of drug resistance, side effects, and patient-specific treatment plans are of great interest. This Special Issue aims to gather a collection of high-quality research articles and reviews that will not only inform the scientific community but also foster the development of novel strategies for cancer therapy. By bringing together researchers from diverse fields, we hope to facilitate a comprehensive dialogue on emerging trends and future directions in cancer treatment. Contributions are expected to adhere to rigorous scientific standards and present novel insights that could pave the way for next-generation cancer therapies.

Guest Editor

Dr. Adilson Kleber Ferreira

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
