

Special Issue

Role of Quorum Sensing in Plant Microbiome: Advances and Prospects

Message from the Guest Editor

This Special Issue delves into recent research on plant-microbe interactions. It specifically focuses on unraveling the molecular signaling within the intricate microbial communities that are associated with plants. Studies that shed light on this communication are particularly welcome. They will help us to understand the molecular mechanisms underlying the recruitment and assembly of functionally diverse plant microbiota from the environment. Unveiling how these microbial communities are assembled is a key challenge in plant microbiome research. This knowledge will provide a crucial foundation for the precise manipulation of these communities for agricultural benefit.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
