Special Issue

Advances in Photodiagnosis and Photodynamic Therapy

Message from the Guest Editors

This special issue is dedicated to the latest achievements in the field of photodiagnosis and photodynamic therapy (PDT), focusing on innovative imaging methods, new photosensitizers, drug delivery strategies and clinical applications. The aim of the issue is to collect basic and translational research that contributes to improving diagnostic precision and treatment efficacy in cancer and non-cancer diseases. We invite you to read papers presenting new molecular mechanisms, biomarkers, light-assisted imaging techniques and hybrid therapeutic approaches. The aim of the issue is to create a platform for the exchange of knowledge between researchers, clinicians and engineers working on the development of photomedical technologies.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
