# New Biomarkers in Pancreatic Diseases

# Message from the Guest Editors

The biomarkers in pancreatic diseases represent significant advancements in the early detection, diagnosis, and management of pancreatic diseases, including the early detection of pancreatic cancer or prognosis in acute pancreatitis. Elevated levels of miR-21 are associated with various pancreatic conditions, making it useful for early detection and monitoring disease progression. Additionally, EV analysis from body fluids offers a noninvasive approach to detecting and monitoring pancreatic diseases, providing valuable insights into disease state and progression. This approach has the potential for more accurate diagnosis and targeted treatment strategies, improving patient outcomes and quality of care.

# Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
