

Special Issue

Molecular Advances in Analytical Techniques for Biological and Medical Research: 2nd Edition

Message from the Guest Editors

This Special Issue is a continuation of our previous Special Issue, titled "[Molecular Advances in Analytical Techniques for Biological and Medical Research](#)". The development and validation of new analytical and bioanalytical methods play a critical role in the field of biological and medical research. The present Special Issue will include reviews and full-length research articles focusing on the most recent analytical advances in the field of biological and medical research and their applications in several areas. This Special Issue is aimed at providing selected contributions on analytical method development, optimization, and validation, as well as on the applications of analytical tools for biological and medical research. Potential topics include, but are not limited to, HPLC, GC, electrophoresis, mass spectrometry, plant materials, validation, metabolomics, proteomics, and protein–ligand interaction. All manuscripts will undergo comprehensive reviews according to standard journal procedures and policies. Thank you for considering our invitation.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
