Molecular Insights and Regulation Mechanisms of Tea Quality

Message from the Guest Editor

Tea quality can be affected by the cultivation and breeding of tea plants; resistance breeding and the tree management of tea plants; molecular biology, the utilization of tea germplasm resources; and the ecological construction of tea gardens. The mechanism of heavy metal accumulation and transport in tea is also interesting, as is the effecting of acidic soil on tea plants. The distribution mechanism of tea plant nutrition in the "soil–root–stem–leaf" cycle and the stress mechanism of metal elements in tea plants in an acidic environment are directly related to tea quality regulation.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
