Metabolomic Profiling in Women's Reproductive Health Research

Message from the Guest Editors

In the last decade, emerging metabolomics science has become a powerful analytical tool for elucidating disease pathogenesis. Unfortunately, Women's Health has historically been a late beneficiary of breakthroughs in the sciences. The deployment of metabolomic tools to address the challenges in diagnosing common disorders such as premature cervical shortening, fetal growth restriction, miscarriage, ectopic pregnancy, prematurity, preeclampsia, gestational diabetes, cervical cancer, endometrial cancer, ovarian cancer, breast cancer, PID, and pelvic disorders is warranted.

In this Special Issue entitled "Metabolomic Profiling in Women's Reproductive Health Research", the journal 'International Journal of Molecular Sciences' issues a call for manuscripts that uses metabolomic approaches to probe and answer pressing questions in Women's Health. Reviews and perspectives as well as original data are welcome. We hope this Special Issue will build on preexisting pioneering work in this consequential scientific area and serve to heighten interest and energize both new and established researchers working in the field Women's Health.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
