

## Special Issue

# Circumventing Resistance to Channel-Targeting Insecticides: A Challenge for Global Health and Food Security

### Message from the Guest Editors

This Special Issue aims to highlight recent scientific advances in this field proposed to limit and even circumvent the appearance of these resistance mechanisms. Therefore, we seek submissions of original research and review articles dealing with different strategies proposed in this area, including, for example, the following:

- Alternating the use of chemicals with distinct modes of action;
- Co-application of chemicals with distinct modes of action;
- Co-application of a synergistic agent with an insecticide to optimize efficacy while reducing the insecticide dose;
- Targeting epigenetic regulators to overcome insecticide resistance;
- Identifying the compensatory mechanisms of resistance, which may reduce insecticide efficacy to discover novel strategies for insect control;
- Recent progress in structural studies of ion channels such as molecular docking, crystallography, cryo-EM, etc., aimed at providing accurate templates for identifying unexpected structure-based target sites and facilitating rational design.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

---

### Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology  
"José Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, MEDLINE, Embase, CAPlus / SciFinder, and other  
databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
