

## Special Issue

# Molecular and Cellular Therapies Barriers and Opportunities

### Message from the Guest Editor

Pathologic perturbations at the molecular, cellular, tissue, organ, and/or organismal levels often drive disease manifestations. Therefore, molecular and cellular therapies have emerged as sophisticated approaches to the management of a large variety of diseases. This Special Issue, "Molecular and Cellular Therapies Barriers and Opportunities" will serve as a platform to facilitate community discussions on the barriers that limit widespread acceptance and use of molecular and cellular therapies. Unlocking the true therapeutic potential of such therapies requires overcoming current barriers/problems, leading to more realistic clinical expectations and true innovations. Therefore, this Special Issue welcomes original research articles, opinion articles, and comprehensive reviews related to problems/challenges, innovations, opportunities, and applications of molecular and/or cellular therapies from all disciplines.

---

### Guest Editor

Dr. O'neil W. Guthrie

Cell & Molecular Pathology Laboratory, Department of Communication Sciences and Disorders, Northern Arizona University, Flagstaff, AZ 86011, USA

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
