Molecular Insight into Oral Diseases

Message from the Guest Editor

Oral diseases represent a global challenge for the medical and dental communities, in terms of both the health and economic burden for affected patients. In addition, the 5-year survival rate of oral squamous cell carcinoma has remained at 50% in recent decades. Furthermore, autoimmune disorders, like oral lichen planus and vesiculobullous diseases, show great variability in terms of response to drug therapy, often representing a real challenge for clinicians. The aim of this Special Issue is to provide new insights into the field of molecular mechanisms that underlie the pathogenesis, clinical behavior, diagnosis, and response to varying therapies for oral and maxillofacial diseases. The topics of this Special Issue include, but are not limited to, the following: Dental caries and periodontal disease; Oral potentially malignant disorders and oral squamous cell carcinoma; Salivary gland disorders; Oral lichenoid disorders; Vesiculobullous diseases; HPV-related disease (benign/malignant); Odontogenic cysts and tumors; Jawbone diseases; Orofacial chronic pain disorders; Other relevant conditions relevant for clinical practice.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
