Advances in Adult-Onset Still's Disease (AOSD) and Systemic Juvenile Idiopathic Arthritis (JIA)

Message from the Guest Editor

Systemic juvenile idiopathic arthritis (JIA) and adultonset Still's disease (AOSD) are systemic inflammatory diseases characterized by fever, evanescent skin rash. pleuritis, hepatosplenomegaly, and arthritis. This extreme variability depends on a diagnostic uncertainty. especially in the early stages of the disease, which has increased the interest in finding new disease biomarkers to better understand its etiopathogenetic mechanisms, to make an early diagnosis, to predict prognosis and to aid clinical decision-making. To date, the diagnosis is based on clinical sign and symptoms interpretation and the detection of serologic nonspecific inflammatory markers of immunological activation. This issue will bring to the forefront scientific advances in the understanding of the pathophysiology and immunobiology of AOSD and JIA. We welcome the submission of articles that synthesize research advances in our understanding of the immune and/or inflammatory mechanisms underlying systemic JIA or AOSD.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
