

## Special Issue

# Breast Cancer: Molecular Pathology, Diagnosis, and Therapeutic Strategies

### Message from the Guest Editor

The aim of this special issue is to address how the characterization and integration of molecular biomarkers have impacted the way we classify and treat breast cancer. The molecular landscape of breast cancer is vast, and there exists a gap between molecular research and its implications in clinical practice. We invite our colleague researchers to submit to this special issue their works focused on novel biomarkers, integration of molecular features in the treatment-decision process and therapeutic algorithms, and both the prognostic and predictive value of molecular assays in breast cancer. We will appreciate original research articles, and review articles will be only considered if they have a clear added value into the available literature body.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
