Molecular Research on Ischemic Stroke

Message from the Guest Editor

Acute ischemic stroke (AIS) is one of the most common causes of the need for care. A lot of basic and clinical research studies have been conducted on brain protection therapy for AIS. The establishment of experimental models of ischemia in vitro, the pathophysiology of neuronal cell death such as apoptosis, regeneration of neural tissues, and ischemic tolerance have become of great interest, and the pathogenesis of cerebral ischemia has become one of the most important research topics in the field of neuroscience. This Special Issue of IJMS aims to focus on both basic science and translational research that will lead from molecular biological approaches to AIS to therapies for this condition.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
