

## Special Issue

# Approaches for Genome Editing Using Viral Vectors of Adenovirus and Lentivirus

### Message from the Guest Editor

Genome editing is attractive because it makes impossible-seeming problems appear possible. This technique has been used in various biological studies. Viral vectors are often effective as a tool in these fields. Because this technique has been generated only recently, there is a lot of potential for new developments and improvements to fulfill possibilities, enlarge these fields and produce new methods.

The presented Special Issue focuses on new approaches to adenovirus and lentivirus vectors. As these vectors are widely used, improvements and new approaches can be shared among many scientists. Additionally, their large genomes and capacity have a wide potential for improvement. Because this Special Issue is method-oriented, a simple use of genome editing techniques employing these vectors is not the focus, but new approaches to these vectors in combination with genome editing are welcome. I hope that your contribution to this exciting and promising field will advance the application of genome editing in basic studies and therapies of various diseases.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
