

Special Issue

Advance in the Study of DNA Methylation 2.0

Message from the Guest Editor

Over the last decade, research regarding topics related to DNA methylation has been developing and expanding. Currently, a description of cellular state is not complete without the complete characterization of the epigenome, of which the most commonly studied and most important aspect is DNA methylation. To advance the field even further, we offer this Special Issue of the *IJMS*, which will collect original research papers and reviews on topics related to DNA methylation as well as on the development of related research.

Guest Editor

Dr. Michael Klutstein

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
