Advanced Fluorescent Probes for Structural and Functional Imaging of Biological Systems 2.0

Message from the Guest Editor

We would like to kindly invite you to contribute to the Special Issue "Advanced Molecular Probes for Structural and Functional Imaging of Biological Systems" of *International Journal of Molecular Sciences* (Impact Factor 4.556). The Special Issue will elucidate the engineering, validation, and application of cutting-edge molecular probes for functional and structural imaging, from cells to intact animals. Novel imaging modalities enabling greater utility of such probes, as well as new biological findings gleaned from experiments performed using these probes, are also within the scope of the Special Issue.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
