

## Special Issue

# Molecular Advances in Alzheimer's Disease

### Message from the Guest Editor

Alzheimer's disease (AD), the most common cause of dementia among the elderly, is characterized by loss of memory and other cognitive functions. The main neuropathological changes associated with AD include synaptic and neuronal loss, astrogliosis, and protein deposition. This Special Issue will focus on reviews and original data manuscripts that concern (1) the molecular mechanism of Alzheimer's and other neurodegenerative diseases; (2) molecular targets for new Alzheimer's biomarkers; (3) the genetics of Alzheimer's and other neurodegenerative diseases; (4) molecular targets for new therapeutic techniques for Alzheimer's; (5) the molecular mechanism of neuroinflammation in neurodegenerative diseases.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
