

Special Issue

Advances and New Perspectives in Plant-Microbe Interactions

Message from the Guest Editor

This Special Issue will bring together an exciting body of recent research, reviews, methods, and opinion pieces addressing the latest knowledge, relationships, and significance of plant–microorganism interactions in the ecosystem and in the development of human society, and how they might contribute toward the global goals of food security, sustainability, and wellbeing. We welcome suggestions from the community by 30 June 2022 for potential articles covering all advances and new perspectives of plant–microbe interaction research in the context of global change. In particular, we welcome articles within (but not limited to) the following broad themes: Agriculture, horticulture, and forestry Molecular plant sciences Climate change

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
