Aging and Heart Disease

Message from the Guest Editors

The burden of cardiovascular disease affects the structure, function, and metabolism of the heart and manifests with multiple conditions, such as coronary artery disease, myocardial infarction, arrhythmias, and heart failure. Aging and cardiovascular disease share several common pathophysiological features. Potential topics include, but are not limited to: new therapeutic approaches to prevent, reduce, or reverse cardiac aging; circulating biomarkers of cardiac dysfunction and failure during aging; the role of epigenetics, inflammation, and immune system in the establishment and development of age-related cardiac dysfunction; and HFpEF. **Keywords:** heart disease; aging; geriatrics; frailty; signaling pathways

Guest Editors

Prof. Dr. Giuseppe Rengo
Dr. Claudio de Lucia
Dr. Leonardo Bencivenga

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
