

Special Issue

Molecular Mechanisms of Carcinogenesis in Airways Tumors

Message from the Guest Editors

Literature review and presentation of personal clinical experience in the management of airways tumors in adults and children, focussing on molecular mechanisms, oncogene promoters and suppressors role, and target therapy aspects.

- Target therapy in airways tumors
- Minor airways salivary glands biological mechanisms
- Carcinogenesis of tumors spreading in airways
- Oncogene role in upper and lower airways tumors
- Tumors of the nose and paranasal sinuses: promoting factors and molecular mechanisms
- Byological mechanisms of the tumors of lower airways
- Carcinogenesis of tumors of airways in children
- Tumors of the larynx: risk factors and oncogenesis

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
