Understanding Amyloid Structures and Disease: A Continuing Challenge in Health Research

Message from the Guest Editor

In this Special Issue, “Understanding amyloid structures and disease: a continuing challenge in health research,” we invite investigators to contribute original research articles and review articles to advance our knowledge in the molecular mechanisms of amyloidogenic protein aggregation and activity, as well as to provide new insights on the development of new therapeutic strategies for the prevention of amyloid diseases. It is our hope that this Special Issue will assist current and future generations of scientists in translating scientific findings into new treatments to effectively delay the onset or slow the progression of amyloid diseases.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
