

## Special Issue

# Antitumor/Anti-inflammatory Activities of Natural Compounds from Plants 2.0

### Message from the Guest Editor

Plants have always been known to be an invaluable source of compounds with multiple pharmacological activities. Although over the centuries the attention towards natural products has undergone various fluctuations, today, many people prefer to use “natural” treatments for different diseases. In particular, concerning neoplastic disease, many natural substances from plants seem to have anti-proliferative and pro-apoptotic capacities and, in many cases, multi-target activity that allows them to affect different pathways that are deregulated in cancer cells and to bypass multidrug resistance mechanisms. Moreover, these substances are characterized by low toxicity and sometimes also by high lipid solubility.

This Special Issue of IJMS will focus on the antitumor activities of functional molecular substances derived from plants on all types of neoplastic disease. Topics of particular interest include descriptive analyses of their activities, molecular investigations on the mechanisms of action, evaluations of their efficacy compared to toxicity, and finally, drug delivery studies.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
