

## Special Issue

# Novel Molecular Approaches to Skeletal Muscle Disease and Disuse 2.0

### Message from the Guest Editor

Muscle-specific diseases with a variety of genetic and acquired causes, as well as aging and metabolic disorders, impair the function of skeletal muscle. This has consequences that extend far beyond muscle itself, with a systemic impact on the quality of life. Exercise can be an important non-pharmacological therapeutic intervention counteracting the effects of disuse; however, mechanistic knowledge on muscle physiopathology can improve its applicability and ensure greater success. With this Special Issue, we aim to illuminate the impacts of omics technologies on the system analysis of muscle disease. We are looking for transcriptomics, proteomics, and metabolomic studies which tackle different aspects of muscle disuse and therapeutic interventions. In addition, we intend to show how new molecular approaches, technologies, and disease models are channeling invaluable information that supports translational research and novel therapeutic approaches. This second Special Issue will host original research articles, as well as reviews and meta-analyses, of omics data on all aspects of muscle disease and disuse.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
