

Special Issue

Autophagy in Health, Aging and Disease 3.0

Message from the Guest Editors

Autophagy is an evolutionarily conserved intracellular catabolic process. It has an essential role in cellular homeostasis, facilitating lysosomal degradation and the recycling of harmful and damaged cytoplasmic components.

This Special Issue of the International Journal of Molecular Sciences, "Autophagy in Health, Ageing, and Disease", will include a selection of original articles and reviews aimed at expanding our understanding of this multifaceted process and providing support for further investigations on the role of autophagy in cellular homeostasis, aging, and disease. In particular, it will contribute to better explaining the complex machinery of autophagy and lead to further investigations on physiological and pathological fields in which the study of this process is still in its infancy.. Moreover, studies on the role of autophagy in age-related processes to open new avenues for the development of novel potential anti-aging therapeutic approaches are also welcome.

Guest Editors

Prof. Dr. Patrizia Ballerini

Prof. Dr. Antonia Patruno

Dr. Mirko Pesce

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"José Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, MEDLINE, Embase, CAPlus / SciFinder, and other
databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
