

## Special Issue

# Regulation Mechanism of Autophagy in Pathogen and Pathogen-Host Interaction

### Message from the Guest Editor

Autophagy is an evolutionarily conserved cellular pathway in eukaryotes vital to a multitude of physiological and pathophysiological processes, such as stress, starvation, and microbial infection. Although there is evidence indicating that autophagy is crucial for the growth and infection-related development of plant pathogenic fungi, its regulation mechanism in the vast majority of pathogens remains obscure. A more comprehensive understanding of the regulation of autophagy in pathogens and pathogen–host interactions can provide us with a greater grasp of the biological processes of pathogens. With this aim in mind, this Special Issue will present recent studies considering:

- The autophagy regulation mechanism of pathogens, including macroautophagy and selective autophagy, such as mitophagy, pexophagy, ER-phagy, and lipophagy.
- The triggering mechanism of autophagy in pathogens or their host.
- The relationship between autophagy and pathogenicity in plant pathogenic fungi.
- The epigenetics of the autophagy process of pathogens or their host.
- New autophagy regulators in pathogens or their host.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
