

Special Issue

The Role of Medicinal Plants in Health and Diseases

Message from the Guest Editor

Medicinal plants have long served as a cornerstone of traditional healing systems and continue to play a vital role in modern healthcare. Their rich diversity of bioactive compounds offers invaluable opportunities for discovering novel therapeutic agents and improving existing treatments. As global interest in natural products grows, scientific research has intensified to better understand the pharmacological mechanisms, clinical relevance, and safety profiles of medicinal plants. This Special Issue, "The Role of Medicinal Plants in Health and Diseases," aims to highlight recent advances in phytochemistry, pharmacology, and evidence-based applications of medicinal plants across a wide range of diseases. We welcome high-quality original research papers, systematic reviews, and critical perspectives that deepen our understanding of plant-derived compounds and their therapeutic potential. By bringing together interdisciplinary studies, this Issue seeks to promote innovation and support the integration of medicinal plant research into mainstream healthcare.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
