# Fundamental and Practical Perspectives in Regenerative Medicine: Proceedings of the V National Congress of Regenerative Medicine (2022)

### Message from the Guest Editors

This Special Issue aims to collate an innovative selection of cutting-edge reviews and original papers from leading specialists with a special focus on proceedings of the V National congress of Regenerative Medicine that will be hosted by Moscow University in November 2022. We invite keynote speakers and participants to provide reviews and original articles with a focus on topics including, but not limited to:

- Breakthroughs in our understanding of human body cellular renewal and regeneration after injury;
- Novel gene, cell therapies and tissue engineering methods to treat human disease (proof-of-concept, pre-clinical and clinical data);
- New mechanisms and pathways that regulate responses to injury, healing and its outcomes (e.g., balance of fibrosis and regeneration);
- Challenges and prospects in the translational aspects of regenerative medicine (including disease models, manufacture and regulatory issues).
