Bioactive Compounds in Metabolic Syndrome

Message from the Guest Editors

Metabolic syndrome is a manifestation characterized by a variety of comorbidities, including hyperglycemia, abdominal obesity, arterial hypertension, and dyslipidemia, which pose a significant risk for the occurrence of cardiovascular diseases and premature death. The obesity starts with a defects in energy balance. The increase of free fatty acids and lipid accumulation in certain organs are mediators of insulin resistance. The fat-derived adipokines, including TNF α and adiponectin, are considered pathogenic contributors or protectors, being involved in the pathways from adiposity to the genesis of dyslipidemia and hypertension. This special issue addresses the potential beneficial role of natural bioactive compounds in the prevention and treatment of metabolic syndromes and described the molecular mechanisms involved.

Keywords:

- metabolic syndrome
- bioactive compounds
- arterial hypertension
- diabetes mellitus
- dyslipidemia
- inflammation
- functional foods

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
