Biomarkers in Common and Rare Neurological Disorders

Message from the Guest Editor

Neurological disorders are the second leading cause of death and the leading cause of disability worldwide. Despite the spread of strategies aimed at the prevention and treatment of some of the most common neurological diseases with a greater impact on health systems, such as cerebrovascular diseases, the prevalence, incidence, and disability and mortality rates of these disorders are rising globally. In this context, translational research plays a key role, with increasing evidence that the identification of reliable disease biomarkers is crucial in the management of common and rare neurological diseases, from diagnosis to evaluation of the therapeutic outcome. For this Special Issue, titled “Biomarkers in Common and Rare Neurological Disorders”, we invite original research articles and state-of-the-art reviews on biomarkers able to increase diagnostic accuracy, defining disease prognosis, stratifying patients, monitoring the therapeutic response and acting as surrogate endpoints in the context of clinical trials and experimental studies, in both common and rare neurological diseases. About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
