# Novel Osteogenic Molecules and Delivery Methods for Bone Regeneration

### Message from the Guest Editors

A growing aging population at an increased risk of fall-induced bone fractures, often combined with impaired bone healing and higher fracture risk due to osteoporosis and diabetes, in addition to the currently inevitable loosening of prosthetic implants over time, necessitates adequate bone regeneration strategies. Current treatment options are associated with high morbidity or deficient efficacy. Osteogenic molecules, especially bone morphogenetic proteins, have been shown to promote bone regeneration, but rapid protein degradation impedes their efficacy and safety due to the high-dosage requirement. Therefore, there is an urgent need for improved molecules with stronger osteogenic properties and/or enhanced delivery of such molecules. New therapy options, such as viral and non-viral gene transfer including nano technology, mRNA technology and gene-enhanced cell therapy, might offer much needed improvement of the current treatment options by enhancing the efficiency of current and novel osteogenic molecules.

### Guest Editors

Dr. Oliver B. Betz

Anderson and Langer Lab, David H. Koch Institute for Integrative Cancer Research, Massachusetts Institute of Technology, 500 Main Street, Cambridge, MA 02142, USA

Dr. Volker M. Betz

Musculoskeletal University Center Munich, University Hospital LMU Munich, Munich, Germany

### Deadline for manuscript submissions

closed (28 February 2023)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
