# Advances in Pulmonary Hypertension and Interstitial Lung Diseases: Mechanisms and Treatments

### Message from the Guest Editors

Pulmonary hypertension (PH) is a common complication of interstitial lung diseases (ILDs). The pathophysiology of PH associated with ILDs (PH-ILDs) is complex and includes pulmonary endothelium dysfunction and pre-capillary vessel remodeling similar to that seen in pulmonary arteria hypertension (PAH). In the majority of ILDs, the patient's PH remains mild; however, it can escalate severely in a small proportion of patients. Worsening PH significantly degrades patients' symptoms, quality of life, and survival. Unfortunately, treatment options for PH-ILDs are limited, with only one medication targeting pulmonary vasculature approved for use in this group of patients—inhaled Treprostinil. A better understanding of PH-ILDs is necessary to improve patient management and outcomes, including alterations in pathways on molecular and cellular level, the identification of patients at risk of severe PH, the role of PAH-targeted medication and the real risk of hypoxemia with their use, or the role of antifibrotic treatment. We invite researchers focusing on both basic and clinical sciences to share their thoughts and results from conducted studies.

### Guest Editors

Dr. Katarzyna B. Lewandowska

1st Department of Lung Diseases, National Research Institute of Tuberculosis and Lung Diseases, Płocka 26, 01-138 Warsaw, Poland

Prof. Dr. Monika Szturmowicz

1st Department of Lung Diseases, National Tuberculosis and Lung Diseases Research Institute, 01-138 Warsaw, Poland

### Deadline for manuscript submissions

31 August 2025

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
